MARVEL-SCAN

This document provides further information on the **MARVEL-SCAN** key features.

MARVEL-SCAN is equipped with a Side-Scan Sonar from *DeepVision*, producing seabed scan images. It comes with a DVL, to compensate current drift, improve positioning and keep altitude from the sea floor. It is equipped with underwater acoustic positioning and communication module.

1	Start key and charging port	6	Side-scan sonar swappable transducers
2	Mast (UHF radio communication, GNSS antenna and status LEDs)	7	Sealed dry body section which contains Lithium-Ion battery and electronics
3	Acoustic positioning and communication module	8	Fins
4	Nose (wet part for buoyancy foam and payloads)	9	Propulsion Thruster
5	DVL (Doppler Velocity Logger)
