

Ocean Sonics Battery Pack

The Ocean Sonics Battery Pack offers features that make the pack easy to handle and service. Each pack uses 72 standard D-cell units, easily sourced locally so battery packs can be shipped empty. Available in two depth ratings; 200m (shown) and 3500m rated with titanium endcap and bottom.

- Lightweight glass fiber composite case eliminates cathodic issues found with metal cans.
- Endcap connector guard doubles as a lever making the release of the endcap a low-effort and safe procedure.
- Levers act as carrying handles for easy transport
- Options for alkaline, lithium primary and nickel-metal.
- Includes rugged case for transport

Total Capacity

- Alkaline -1500 W-h
- Lithium - 4500 W

Terminal Voltage

- Lithium: 25V
- Alkaline: 22.5 V.

Options Include:

- Massive data memory (4TB) for networking multiple hydrophones
- Data-processing Hub that runs Ocean Sonics' classifiers or Linux-based custom classifiers.

Easy Open Procedure for Battery Pack: Just release locking levers and lift!
